You can use these custom menus in your browsers, download managers, FTP clients, image browsers, and even on your keyboard with Keyboard Maestro. Using KEYMACRO you can create virtually any menu you want. It's easy to create and save the menu. You can also assign hotkeys, change the speed, skip menu items, and more. Once you've created your menu, the program allows you to copy and paste the menu into any application with just a few clicks. KEYMACRO includes 2 different types of menus: ~ Main Menu (where all of your web browsing and download menu items are located) ~ Sub Menu (if you have web sites that have multiple pages you want to skip, then the Sub Menu would be the way to go. DOWNLOAD PAGE Author: Andreas Kuhne - Description: Keyboard Maestro Keymacro v1.1.2 OS: Windows XP/Vista/7/8/10 Price: \$27.00 Detailed explanation: Keyboard Maestro: Keyboard Maestro is a Keyboard Maestro add-on that allows you to define which shortcuts will perform which actions in the application you're currently using. Keyboard Maestro was designed for PC users but it can be used on any device with the use of the right device driver. Every time you want to use a new shortcut, you simply add it to the "Maestro Recipe". It's also possible to use a "Recipy" with many shortcuts in it.

With the help of the "Pre" and "Post" actions you can make actions before and after a specific event happen. There's also a "Start" action that will perform a custom action when you press a specific key. Multiple "Recipies" can be used at once and they can be saved in a "Recipe Book". Keyboard Maestro's "Recipe Book" is also very useful for example if you want to make all of your Windows' shortcuts into one single "Recipie". Keyboard Maestro's "Recipe Book" will make this very easy to do. You will only need to add all of your shortcuts in one
